ADVANCED TECHNIQUES FOR VENEER MAKEUP AND MASKING DARKENED TEETH

October 10-12, 2025

EVERSMILES

Stratify
Composite Resin Veneers

Felipe Bezerra

COURSE DESCRIPTION

Join this exclusive and intensive 3-day program, designed to enhance your skills in creating direct composite veneers using a simplified, monochromatic approach. This innovative method is further enriched with advanced natural makeup techniques, utilizing pigments to elevate the aesthetic outcomes of your veneers to the next level. The case features the upper teeth (from premolar to premolar), including two discolored teeth.

EVERSMILES

WHAT YOU WILL LEARN

- Development of multichromatic dentin effects
- Creation of natural incisal translucency
- Achieving harmonious cervical chromaticity
- Building counter-mamelons and supra-mamelons
- Designing incisal halo effects
- Mastering advanced pigmentation techniques for natural enamel effects
