COURSE DESCRIPTION

- Traumatic dental injuries occur at the least convenient time. A call from a distraught parent of a dento/facially injured child is one of the few acute emergencies seen by dentists that warrants rearrangement of the office schedule. What is required for the best practical treatment plan in dental trauma cases, is a broad range of diagnostic and clinical skills.
- Improve your knowledge and learn more about rapid accurate diagnosis of traumatic injuries; assessing prognosis and future treatment; emergency splinting techniques; and...

COURSE AIM & OBJECTIVES

- Identify predisposing factors for traumatic dento-facial injuries.
- Conduct a comprehensive historical review, clinical and radiographic examination of traumatic injuries.
- Effectively management of dental traumatic injuries.
- Distinguish between mature and immature permanent teeth.
- Provide repositioning, splinting and long-term follow up care.
- Counsel patients and parents on prevention of traumatic injuries.

This course will be discussed in 6 sections including:

- 1- Crown Fractures
- 2- Root Fractures
- 3- Luxation
- 4- Avulsion
- 5- Traumatic Injuries in Primary Dentition
- 6- Repositioning & Splinting

Dental Trauma Management
