Approval does not imply acceptance by any  
regulatory authority or AGD endorsement.  
7/1/2019 to 6/30/2021.  
Provider ID# 390645

## COURSE DESCRIPTION

- Over the course of several decades implant dentistry has evolved to include digital technology and benefited in many ways. Faster more efficient workflows have been developed, making clinical practice better and more accurate. Digital dental technology is entering into the mainstream stage and is used by many dentists. This is perhaps the most exciting phase in the evolution of technology adoption. The community of users is growing at a fast rate, leading to advances and innovations in multiple platforms that can be synergistically combined to improve outcomes. Implant procedures are one of the most exciting facets of dentistry that has been enhanced by digital technology. The innovations explored in this course provide clinicians with the tools for diagnosis, planning, placement and restoration of implants in a truly transformative way that is quickly becoming the standard of care.

Digital Workflow for Implant Dentistry Advanced technologies in diagnosis, treatment planning and surgical/prosthetic procedures of dental implant therapy.

## COURSE AIM & OBJECTIVES

- Understanding digital technology and innovations in implant dentistry.
- Clarifying workflow and process of digital tools used in implant dentistry.
- Understanding how to implement digital workflow in clinical practice.
- Identifying the clinical advantages of digital dentistry versus conventional dentistry.
- Understanding patient care improvement by using digital workflow.

## INSTRUCTOR BIO

- Dr. Dowlatshahi worked as an Assistant Professor, and the head of the Research Department of Periodontology at Jundishapur Dental School in Ahwaz, Iran.
