EVERSMILES

Felipe Beyer

COURSE DESCRIPTION

Join this exclusive and intensive 3-day program, designed to enhance your skills in creating direct composite veneers using a simplified, monochromatic approach. This innovative method is further enriched with advanced natural makeup techniques, utilizing pigments to elevate the aesthetic outcomes of your veneers to the next level. The case features the upper teeth (from premolar to premolar), including two discolored teeth.

WHAT YOU WILL LEARN

- Development of multichromatic dentin effects
- Creation of natural incisal translucency
- Achieving harmonious cervical chromaticity
- Building counter-mamelons and supra-mamelons
- Designing incisal halo effects
- Mastering advanced pigmentation techniques for natural enamel effects

Additionally, you will develop practical skills to apply simple and effective methods for masking darkened teeth, delivering high-quality solutions for even the most challenging cases.

PERFECTING THE FINAL DETAILS

The course concludes with a meticulous refinement of primary, secondary, and tertiary anatomy, ensuring your veneers are aesthetically stunning, fully functional, and lifelike.

Take your practice to the next level and master composite resins like never before!

March 27-29, 2026

Friday, Saturday & Sunday

8:30 AM to 5:30 PM

Canada, Toronto
