The future of implant dentistry is digital—and it's already here. P3: Plan. Print. Place. is an immersive education program designed for dentists who are ready to embrace cutting-edge digital workflows and elevate their implant practice. This course introduces participants to the power of guided surgery using advanced digital tools and AI-driven planning software. You'll learn how to integrate CBCT and intraoral scan data, design precise surgical guides, and produce them in-house using 3D printing technology. The program culminates in a hands-on session where participants will place implants on a dental model using their custom-designed guides—bridging the gap between virtual planning and real-world execution.

***Sunday April  
26th, 2026***

**1x Strauman Implant  
1X Strauman Healing Abt.  
1x Scanbody  
1x Virtual Planning Session  
1x Surgical guide  
1x Final Crown**

## Learning Objectives:

- Gain a comprehensive understanding of the guided surgery workflow: treatment planning, guide design, 3D printing, and implant placement.
- Learn to navigate AI-powered surgical planning software and accurately merge CBCT and intraoral scan data.
- Understand key principles of surgical guide design for optimal clinical outcomes
- Explore the hardware and software requirements needed for in-house 3D printing of surgical guides.
- Apply the guided drilling protocol in a hands-on model-based simulation using your own printed guide.

**SPEAKER:** Dr. Saman Jomehri

**TIME:** 8 am Breakfast & Registration.

**LOCATION:** 86 Wilson St, Oakville, ON L6K 3G5

**TUITION:** \$950 CAD + HST

**TYPE:** Hands-On

**CE HOURS:** 8

**REGISTRATION:** visit [Eversmiles.ca](http://Eversmiles.ca) or Call/Text: +1(437)556-5351

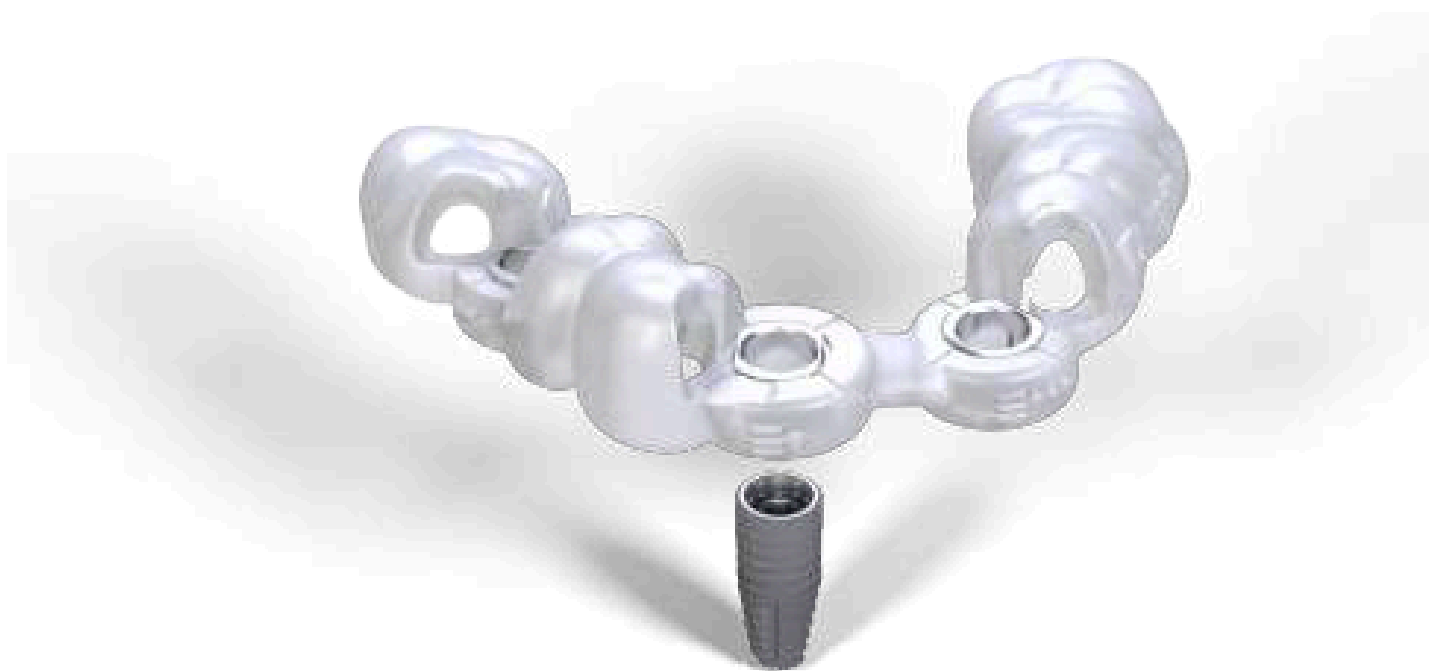

more info:

**+1(437) 556-5351, +1(416)723-8003**

Dr. Jomehri earned his Doctor of Dental Surgery (DDS) degree from the Tehran Azad School of Dentistry in 2008. He went on to complete a two-year implant fellowship from the College Extra-Universitaire d'Implantologie Oral et Maxillo-Faciale (CEUIOMF) under the mentorship of the renowned Professor Manuel Chanavaz. He is a recognized Fellow of the International Congress of Oral Implantologists (ICOI) and maintains a private practice in Oakville, where he focuses on digital workflow integration, guided implant surgery, bone grafting, and surgical extractions and IV sedation.
